

modusGate

E-mail Security Appliance

The Power of Modus.
The Reliability of Dell.

The End of Spam.

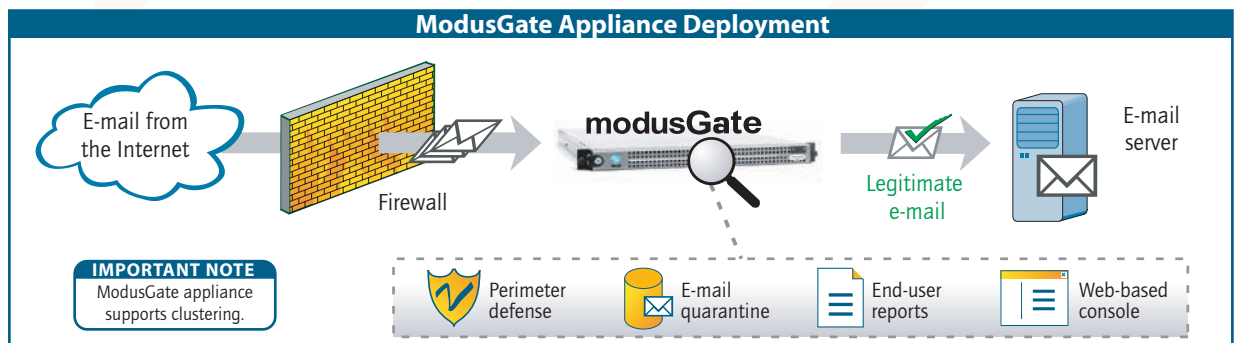

Powered by
DELL™

SECURED BY
modus3

Vircom's industry-acclaimed ModusGate now comes in its simplest and most reliable form ever: a set-and-forget, stand-alone appliance powered by Dell™ and compatible with any e-mail network!

In one complete package, the ModusGate appliance solves your spam problem, keeps viruses, worms and forbidden file attachments out of your users' inboxes and hardens your global network security by preventing breaches, service abuses and the many other threats coming from the open Internet.

Features

All ModusGate appliances include the following:

- Web interface for user settings and administration
- Unattended auto-update service for security, spam and virus definitions
- Built-in quarantine and report database
- One full year of Modus customer support from Vircom
- Dell's three-year on-site hardware service with replacement units
- Restore / install CD
- Simple, step-by-step install checklist
- Secure, hardened OS
- Command line interface for automated billing and provisioning
- Remote monitoring and management capability
- Free shipping in North America

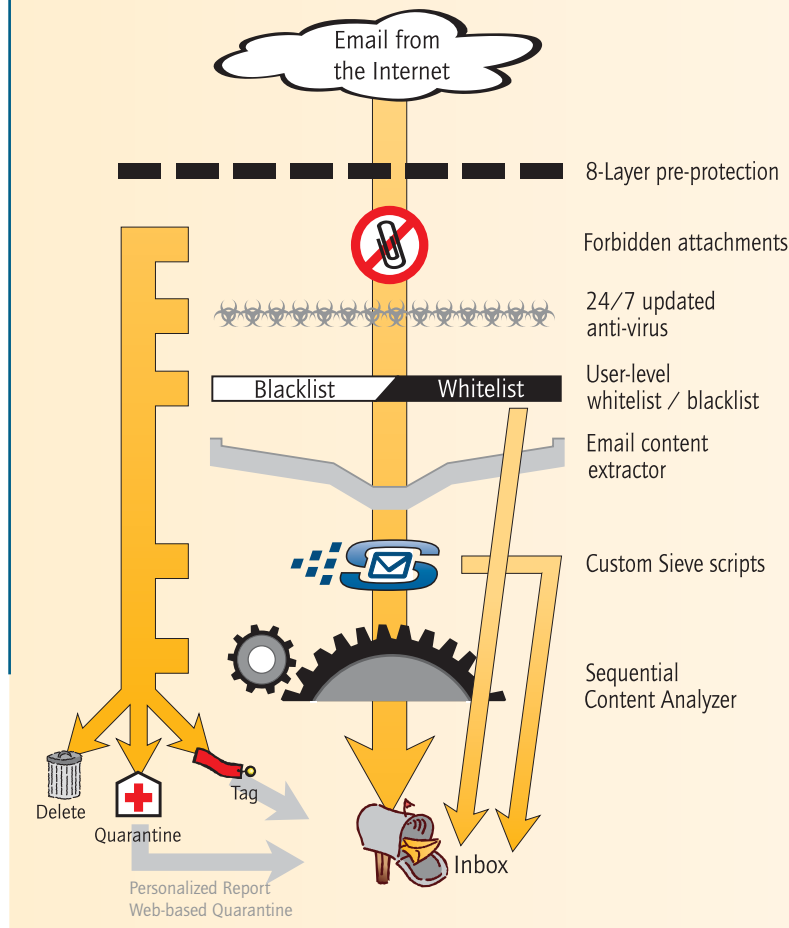

ModusGate Appliance Highlights

- **Low administration overhead**
ModusGate populates the user list automatically by analyzing incoming messages and validating them with the protected e-mail server, eliminating the need for manual list operation. Furthermore, ModusGate allows end-users to access their own settings and quarantined emails through a web interface, giving administrators the option to delegate management responsibilities to the end-users.
- **Spam protection**
Consistently rated by industry experts as a leader in spam protection, the ModusGate appliance provides you with unmatched efficiency and flexibility without any administration overhead.
- **Virus protection**
ModusGate is available with world-class anti-virus options from McAfee and Norman. ModusGate seamlessly integrates the A/V engine, making it one less service to manage.
- **E-mail caching engine**
ModusGate has a built-in message transfer agent (MTA) that can cache your incoming and outgoing mail queues, preventing dropped or lost e-mail in the event of mail server or internet connection failure and smooth out performance bumps during peak periods.
- **Perimeter defense**
ModusGate's 8 levels of transport-layer security can proactively stop Denial of Service (DoS) attempts and block scan or dictionary attacks, without affecting performance and legitimate e-mail traffic.
- **Custom rules and filtering**
ModusGate's custom Sieve layer allows you to create powerful script sets which complement the main anti-spam engine, allowing for policy management and rules-based processing.

The ModusGate e-mail security appliance can be installed and running in less than 15 minutes, protecting your network against spam, viruses and malicious intrusions such as denials of service, hijacking and dictionary attacks.

Powered by a robust Dell platform and automatically updated by Vircom, your ModusGate appliance will deliver efficiency and reliability, requiring virtually no IT maintenance or supervision.

The Modus Technology

Overview

Vircom's Modus3 technology is based on a holistic model designed to optimize the treatment capacity and to maximize the performance of the anti-spam engine.

Spam identification, classification and rejection is performed at 14 different key stages in the filtration process, facilitating early clearance of basic spam messages and yielding maximum CPU throughput to process more complex forms of spam messages.

Modus-powered solutions were designed for the most demanding ISP and enterprise environments. They offer an out-of-the-box 98.2% catch rate and 99.99% false positive protection while offering the widest array of productivity and delegation features available in the industry.

Appliance Packages

Business Series

Capacity: Up to 500 users
 Format: Tower
 CPU: 2.4 GHz Celeron™
 RAM: 512 MB
 Storage: 40 GB 7.2 K Single
 Network: Single NIC
 Power supply: Single 110/220V

Enterprise Series

Capacity: Up to 2,000 users
 Format: 1U Rackmount
 CPU: 2.8 GHz Xeon™
 RAM: 1 GB
 Storage: 2x36 GB 15K Mirrored
 Network: Dual Gigabit NIC
 Power supply: Single 110/220V

Global Series

Capacity: 5,000 to 10,000 users*
 Format: 1U rackmount
 CPU: 2.8 GHz Xeon™
 RAM: 1 GB
 Storage: 2x73 GB 15K Mirrored
 Network: Dual Gigabit NIC
 Power supply: Redundant PS option

* Depending on configuration

Discover why so many ISPs and corporations rely on ModusGate. Vircom's Modus-powered solutions protect over 5,000,000 mailboxes worldwide and have blocked billions of spam messages, enabling organizations to save millions of dollars through productivity gains, better system resources allocation and increased network security.

Your organization can benefit from ModusGate's protection today. Contact us to find out which Modus-powered solution best suits your needs and put it to the test, free of charge, and see for yourself.

<< A 'set-it-and-forget-it' proposition >>

Myron Bradshaw, CMC sysadmin
NASA Goddard Space Flight Center

<< It basically runs itself! [...] saving us up to \$50,000 a year >>

Mike Dooley, sysadmin, Teralogic

<<... an 'all-in-one' solution >>

Regis Holstein,
TDS Communications

<< Vircom has provided us with a great product in Modus3 and great tech support.

I am not sure I could ask for anything more. >>

Drew Salmon,
Network Operations Director
2Fast Communications
