

ModusGate Quick Evaluation (Corporate)

Overall description

The demo environment consists of a ModusGate gateway running in front of a MS Exchange 2003 Server (in this case both running on the same Windows 2003 Server).

The environment allows you to:

- Redirect Ham & Spam to your test email address and to review:
 - Your Inbox (using the OWA WebMail)
 - Your Quarantine
 - Using ModusGate's WebQuarantine
 - Through your Quarantine Report (in your inbox)

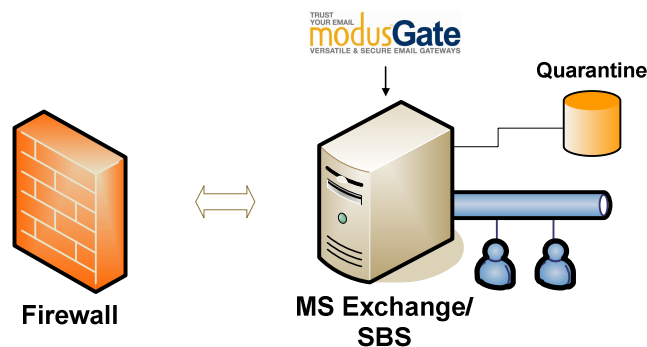

Figure 1: ModusGate/Exchange demo Setup

Contact us (Tel: +32 10-48.35.14 or Email: support@vircom-europe.com) for a test account. We will provide you with your test email address(es) and password(s).

Important Note

This quick evaluation environment only highlights the efficiency of our anti-Spam engine and the effectiveness of our user interfaces. We would recommend installing a full trial version of our ModusGate in your own test environment to judge its full power.

Accessing your Interfaces

Access your user Exchange WebMail OWA inbox at:

- <http://www.vircomeurope.com/exchange>
- Use your account information to log in.

Access your WebQuarantine at:

- <http://www.vircomeurope.com/quarantine>
- Use your account information to log in.

Test proposal

Testing the anti-Spam Efficiency

The following steps will help you start the test:

1. Redirect messages from your own test mailbox towards your Vircom test account. Alternatively, you can directly send Spam & Ham to the test account. When resending spam to your test account makes sure that the full spam (incl. headers) is resent. For doing so:
 - Open your existing spam message,
 - Ask for "resend this message" (MS-Outlook). Send.
2. Open you Exchange OWA WebMail to check your test Inbox.

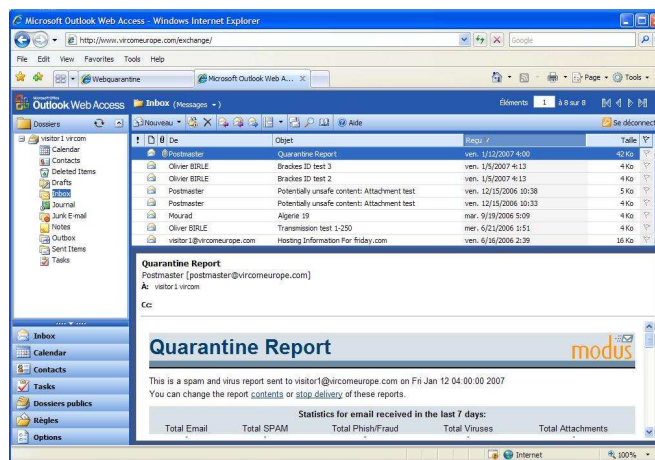

Figure 2: OWA WebMail

Verify that:

- You received the Ham messages,
- You did not receive Spam messages.

3. Open your WebQuarantine to see blocked messages.

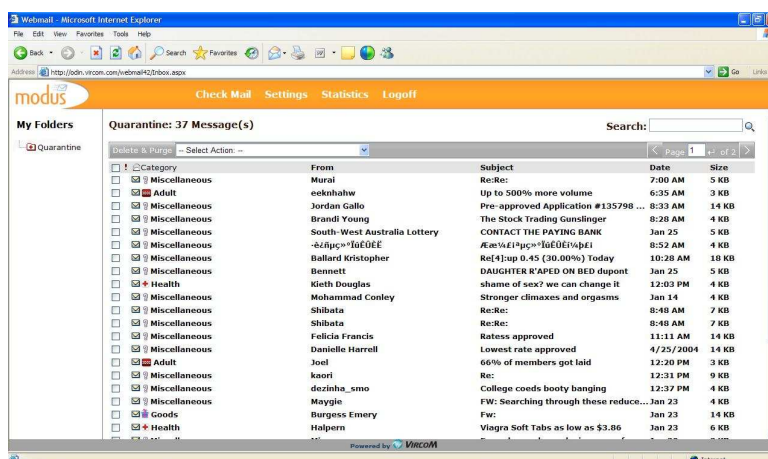

Figure 3: ModusGate Web Quarantine

Verify that:

- ModusGate blocked the Spam messages,
- ModusGate did not block Ham messages.

Testing the User Interfaces

- In WebQuarantine, select "Settings / Quarantine Report" as highlighted in the above screenshots, and request a new report by clicking on "Generate Report Now".

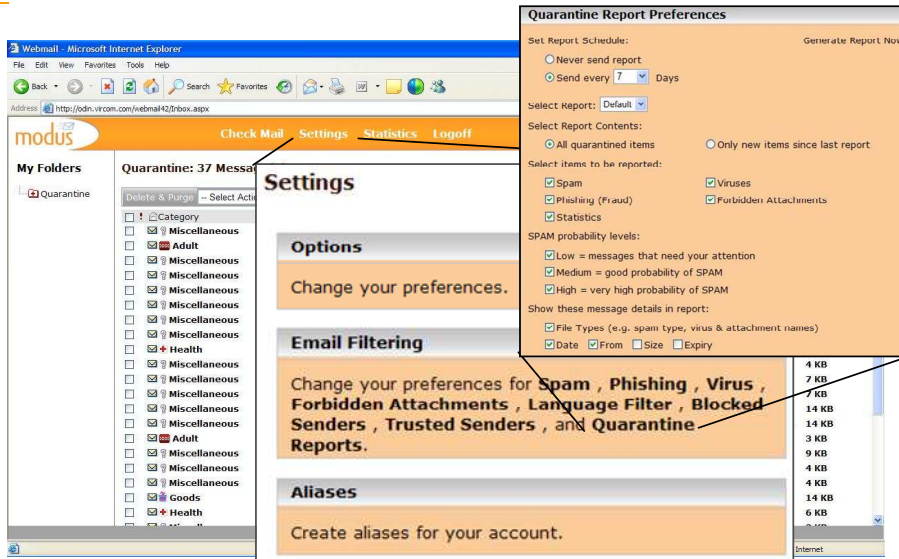

Figure 4: WebQuarantine Interface

- In your inbox, you will receive a message with your Quarantine report, as shown below:

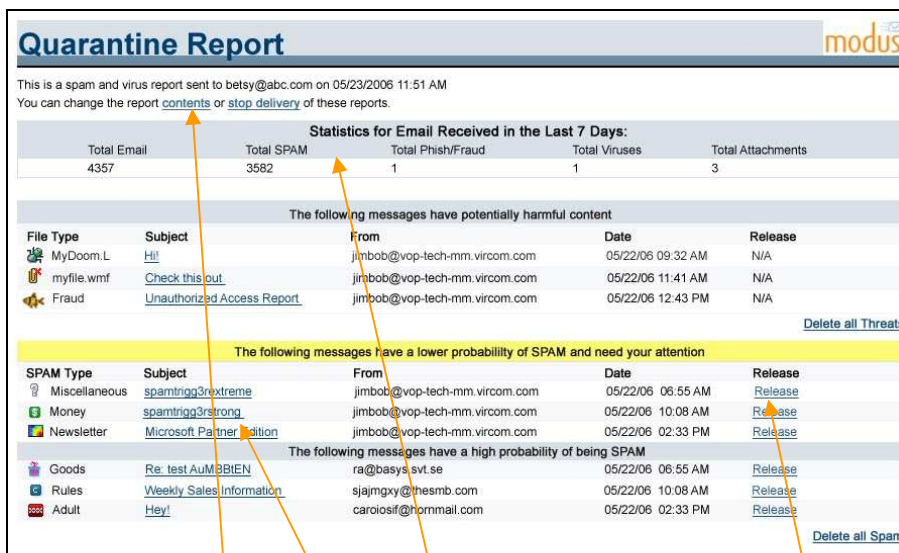

Figure 5: Quarantine Report

You can now:

- View your personal filtering **statistics** for the last 7 days
- Check how easy it is to **view** blocked messages,
- Check how easy it is to **Release/Report messages and/or Whitelist** trusted sender
- Click on "**contents**".

This opens your "Quarantine Report Preferences" screen. You can:

- Ask a new report to be generated, or
- Define the items to display within your report.

6. Play with your Quarantine Report interface and change your display settings to see their impact on your Quarantine Report.
7. Return to the WebQuarantine. Play with the interface and change your settings (anti-Spam, anti-Phishing...) to see their impact on your email environment. Note that some settings are marked with a , as shown in the example below.

Figure 6: Blocked Settings

These settings are blocked by the ModusGate Administrator, and users can therefore not change them.

8. In WebQuarantine, view your personal [Statistics](#).
