

98.2% catch rate.
99.99% false positive
protection. ISP-certified.

for so long provides Vircom with an undeniable experience and a deep understanding of the day-to-day hassles brought up by the ever-increasing spam problem. That is why ModusMail has so much to offer; it represents the sum of years of R&D and industry experience.

Spam hurts. It causes organizations millions of dollars in IT costs, productivity losses and system clogging. A 2003 Radicati study reveals that unsolicited email has reached a record-breaking 45% of all e-mail traffic on the Internet.

Vircom has been tackling the spam problem as early as 1998 with ISP-proven reliable solutions. Being deployed in the industry

with ISP-proven reliable solutions. Being deployed in the industry with a deep understanding of the day-to-day hassles brought up by the ever-increasing spam problem. That is why ModusMail has so much to offer; it represents the sum of years of R&D and industry experience.

Custom Sieve scripts

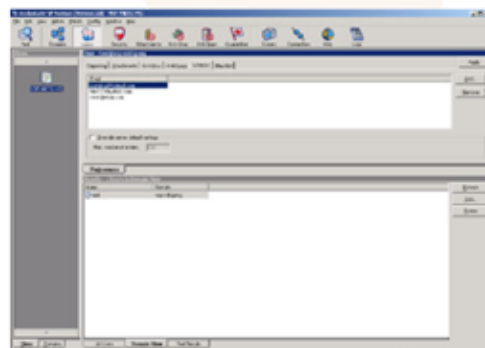

ModusMail is capable of remarkable e-mail delivery performance and offers many productivity advantages, such as multi-level delegation, to system administrators in search of time-saving tools.

Security wise, ModusMail's advanced multi-layered technology relies on up to 14 different means of intercepting spam to clean your inbox while protecting you against the countereffects of false positives generated by most other anti-spam solutions.

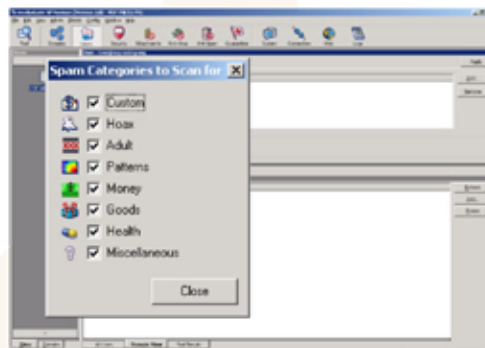

Whether you are an ISP concerned with system performance and added value or a corporate user with demanding accuracy and reliability needs, ModusGate is the definite solution to put and end to spam concerns in your organization.
